Mechanical Seals

Mechanical Seals for Pump shafts provide the best possible seal for a rotating shaft.

ASP Type 2 Seal

ASP Type 2 seals are ideal for use in most rotating shaft applications. The rotating head has been lowered into the spring coils to accommodate shorter stuffing boxes. They perform well in a wide range of applications from water, steam, chemicals, etc.

The ASP Type 2 has a self-aligning design that automatically adjusts for abnormal shaft end play and run out. Its non-clogging single spring design makes it ideal for pulp and paper, waste water, and many other demanding applications. The ASP 2 dimensionally conforms to ASTM F1511-94 and for most applications is a direct drop in replacement for an original equipment seal. Seal Ratings: Pressures: up to 425 psig
Speeds up to 4500 rpm, Temperatures: -20 F to +400 F (Viton), -40 F to +225 F (Buna-n)
